**Madonna** has maintained her ageless face over the last few decades by enforcing a "regular religious" skincare routine. The *Ray of Light* hitmaker has not skipped a beat when it comes to her beauty regimen, according to her dermatologist Dr. Paul Jarrod Frank, **who helped the star create her MDNA skincare line.**

"Consistency, routine, and finding something effective is key for Madonna," Dr. Frank tells *Marie Claire* magazine. "It's not the occasional pampering that leads to graceful ageing, it is the regular religious care that you give your skin day in and day out."
